Contact4me

Contact4Me [1] provides a caring service that notifies members' loved ones and next of kin within minutes after an emergency occurrence.

It is recognised that it can take emergency services up to five or six hours and even days to contact a person's next of kin. **Contact4Me** [1] is a simple membership card facility – which allows members to 'store' up to ten emergency contact numbers on a central database.

In an emergency or accident, when the cardholder may not be conscious or in full command of senses, the card will give emergency services instant access to essential family and friends' telephone numbers and crucial medical alerts. A member can update contacts in real time from anywhere in the world and the changes will be instantly accessible.

Each member receives two membership cards, key fob, weatherproof sticker as well as other useful items of identification. These items all quote the website, dedicated UK and international phone number and the unique membership number of the member. This makes it very fast and easy to access a members' list of emergency contacts.

The service provides extra security for the member and peace of mind for their family, carers and friends.

Emergency services would benefit greatly as the system allows:

- | early access to a close relative, who might need to make important decisions.
- | knowledge of crucial medical alerts is invaluable during the "golden hour".
- | no time wasted trying to locate a relative or next of kin as database holds up to ten emergency contacts.
- | database will normally be up to date, due to constant reminders being sent to the member.
- | subjects will normally be carrying at least three separate Contact4Me pieces of identification.

Sign up with **Contact4me** [1] through this site and they will donate £5 per main member to help Epilepsy Action's work.
